WAREHOUSE FINDS

Great "new old stock" books! The publishers overprinted and stored their surplus away for years. All are in like-new unused condition. We bought them fairly cheap and pass the savings on to our fellow rocketry fans.

ROCKETS & MISSILES OF WORLD WAR III, R. Berman and B. Gunston, 1983. Large and deluxe "coffee table" book with 230 photos, many in color. This is one of the two best of its type we've seen and used. \$25 value if it could be found today. \$17

A COLBY BOOK ABOUT...series: Early 70's reprints of early 60's youth photo books with rocket shots. Similar books today cost \$10-\$12.
