Do a good deed . . . Take a Rocket-Eating Tree out to lunch!

"Model Rocketry at its Best!"

CENTURI Engineering Co.

CENTURI

Phoenix, Arizona

No. 3 July, 1974

R & D ROCKET DESIGN CONTEST!

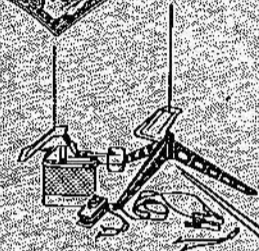

HERE'S YOUR CHANCE TO "SHOW YOUR STUFF" AND MAYBE WIN ONE OF MORE THAN 40 FABULOUS PRIZES!

1st PRIZE

ROCKET ALLOWANCE FOR A YEAR!

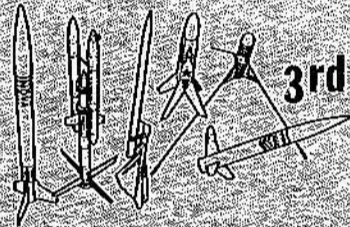

\$10 MERCHANDISE CERTIFICATE EVERY MONTH! USE THEM AS YOU GET THEM, OR SAVE 'EM. . . \$120 TOTAL VALUE!

2nd PRIZE

5 COMPLETE LAUNCH FACILITIES

Launchers & accessories for all kinds of launching! Powr-Pad & Tilter, Power Tower, Powr-Control, extra heavy-duty launch rod, and cluster clip-whip! Five chances at 2nd place!

3rd PRIZE

10 FLEETS OF MINI-KITS

A complete set of the fantastic Mini-Motor rocket kits: Nova Fireflash, Startrooper, Two-Bitz, Satellite 62SL, Mini-Dactyl! Ten chances to win 3rd prize!

4th PRIZE

25 R & D CERTIFICATE AWARDS!

Handsome engraved document, personally inscribed by Leroy Piester, our President, certifying the winner's contribution to creative model rocket design. 25 chances to win!

So many of you have been asking us to have another design contest since our last big one in the summer of 1972.

Not wanting it to be just another contest, we've strained our brains to come up with something really special!

We will treat you just like one of our very own rocket designers in Centuri's Research & Development Department! Here's what we mean . . . Picture, if you will, yourself working away in our secret research laboratory hidden away somewhere near the Rocky Mountains . . . The door bursts open and in rushes the company brass, saying "OK fellows, we've got a weird problem! Our production people found a big surplus stock of this particular nose cone. We want you to design a special kit which will help use them up before they start running out our ears! Make a large, impressive kit with futuristic lines, lots of decals, pods, whatever. It could look like an alien spaceship, imaginary sounding rocket, a military craft or almost anything . . . but don't have it look like any other kit. And don't forget to use the nose cone!"

You can pick up supplies and parts at your local retailer, or send directly to us for them. If you no longer have our current catalog (No. 73) see note at bottom right hand corner, on the back page.

Well, that is your mission, should you choose to accept it! Your design must use one or more of these Centuri nose cones.

#5 Series	Cat. No.	Price
	PNC-54	25¢
	PNC-55	2/30¢

#7 Series	"Orion Pod Cone"	Price
	PNC-71	30¢
	Not in catalog	

#8 Series	Price
	PNC-89 60¢

#10 Series	Price
	PNC-102 75¢

#13 Series	Price
	PNC-132 70¢

#16 Series	Price
	PNC-165 90¢

#16 Series	Price
	PNC-167 \$1.20

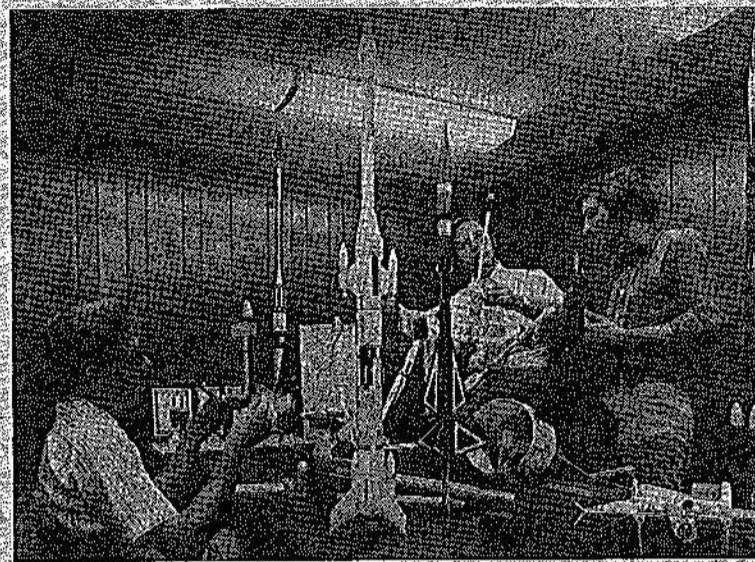

#20 Series	Price
	PNC-231 \$1.00

That deadline of October 31 may seem a long way off . . . but it isn't really! Allow time to design the model, receive all the parts, build and test-fly it, and time for your photograph to be developed.

The first, second, and third place winners will be announced in a future issue of Rocket Times . . . probably #5 (two issues after this one).

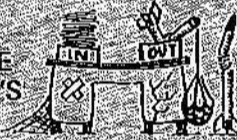

DESIGN CONTEST RULES

1. Entries must consist of a photograph of the completed model, and a drawing on 8 1/2" by 11" paper which illustrates and explains the various parts. Put your name and address on the back of each.
2. Entries must use one of the indicated parts, be flight worthy in the opinion of the judges, and look noticeably different than commercial model rocket kits.
3. Entries become the property of Centuri Engineering Company and can not be returned.
4. Employees of model rocket companies and their immediate families are not eligible.
5. Entries will be judged on originality, neatness of drawing and construction, practicality and completeness.
6. Do not send the actual model, because it cannot be returned.
7. You may enter as many different designs as you like.
8. Deadline: Entries will not be accepted after October 31, 1974.
9. Send all entries to:
R & D Design Contest
Centuri Engineering Co.
P.O. Box 1988
Phoenix, Az. 85001

Shown above are some of the judges and entries in our Customizing Contest back in 1972. In that contest we had actual models sent to us, instead of photos and drawings as in our new R & D Rocket Design Contest. Please don't send your actual models, or we won't have any room left to pack kits!

FROM YE OLDE EDITOR'S DESK

Grant Boyd, Editor

Salutations, Centurions! For you newcomers who have never seen "Rocket Times" before, this is our way of keeping in touch with rocketeers who mail-order regularly.

While previous issues were only sent with orders being shipped, many thousands of this issue are being sent to Centuri Aerospace Team Members as an experiment. With your mail order support we can continue sending it on a regular basis, and maybe even expand "Rocket Times" to more pages, technical articles, whatever.

We've replaced the large I-1A-100 tripod launch stand with the new "Power Tower" (see back page) . . . it does everything the "100" did, and more! And for less cost. Check it out, you true believers.

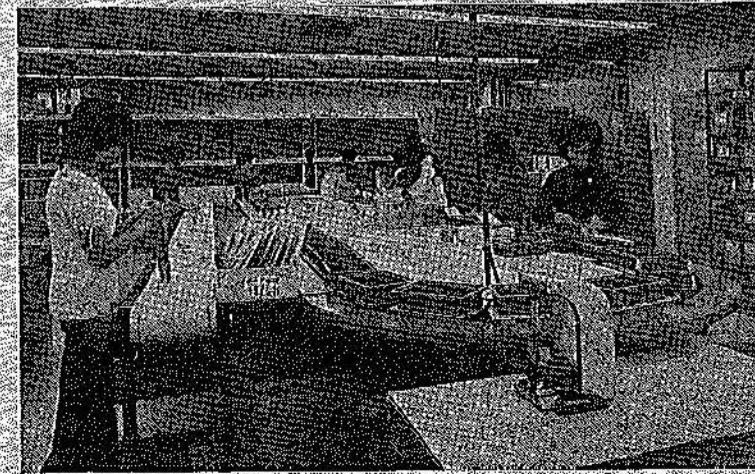

Enerjet is now being "Phased-Down", but is still very much in the mail order business . . . see catalog offer on back page.

Several offers in this issue require that coupons be cut out . . . so we'll enclose another copy with your next order. Or, just request a fresh copy and enclose a self-addressed stamped envelope.

Our shipping department folks asked me to pass this on: if you send an order within two weeks of receiving this issue, they will include a free "Promptness Prize" . . . a giant decal sheet of emblems.

THE GRAND TOUR

NO. 3 IN A SERIES OF PHOTOS OF CENTURI

Here is part of the Small Kits Packing Department. These ladies work accurately and efficiently using a conveyor system originally designed for a missile guidance system factory.

NO. 3 IN A SERIES OF PHOTOS OF CENTURI

Here is part of the Small Kits Packing Department. These ladies work accurately and efficiently using a conveyor system originally designed for a missile guidance system factory.

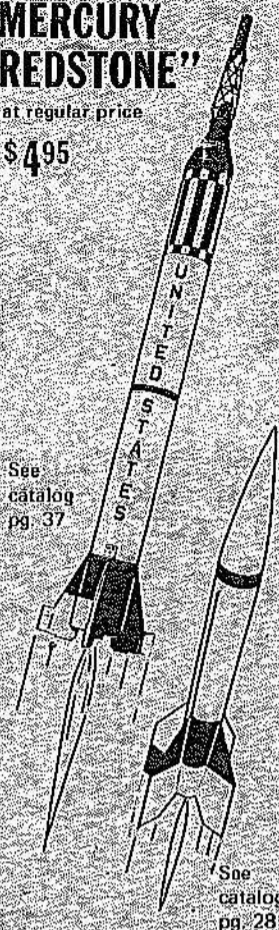

SUPER SCALE... SUPER SALE

This is a special offer, just for you readers. Chances are you have already used the "Freebie" bonus offers on the back of our current catalog... and are ready for something new!

Here's how it works: Buy one of the large Super-Scale rockets shown here (or at least equal dollars worth of other Centuri products) and receive another scale-type rocket for only "pocket change!" Just mark the appropriate coupon (printed on order blank on the back page), and include the right amount of "change" in the printed line under "sub-total." For instance, if you buy a 1/45th Little Joe (or at least \$15.95 worth of other stuff) and include another 69¢ you can receive a Nike Smoke kit. You can use more than one of the offers, as long as their value does not exceed what you are buying. Example: Use the Mercury Redstone offer (\$4.95) and the Saturn 1B offer (\$10.95) if your order totals at least \$15.90... then include 29¢ for your MX-774, and 49¢ for the Aerobee 350.

Offers apply to Mail Order only.

BUY ONE
"MERCURY REDSTONE"
at regular price
\$4.95

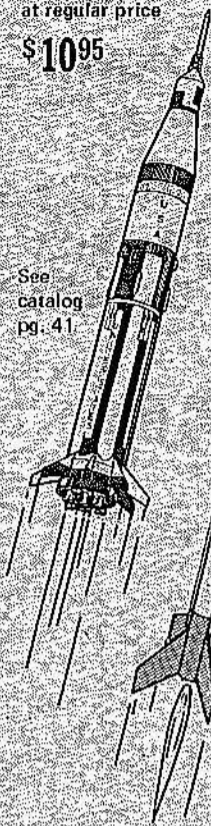

See catalog pg. 37

See catalog pg. 28

AND GET ONE

AND GET ONE
"SKY-LAB"
for only **89¢** (\$4.95 value)

COMPLETE STARTER OUTFIT

Catalog No. 3502 **\$12.95**

Here is the latest rocket outfit from Centuri! You probably already got your "start" some time ago, so here is a great one to recommend to friends who want to get in on model rocketry. It's like the popular "Eagle Power" Outfit, but with more of everything in it!

• Deluxe POWR-PAD LAUNCH SYSTEM (will launch more than 500 times with recommended battery). Now you can adjust the "launch angle" with special "tilter" to compensate for wind... and for "Spot Landing" competi-

tion. (Battery not included.)

- Unique FIRING CONTROL HANDLE requires special safety key (included) to be inserted before launcher can be activated.
- "SCREAMING EAGLE" rocket. This almost-ready-to-fly bird assembles in minutes. No painting or tools required! The "Eagle" comes with pre-colored body, nose cone, and molded fin set. It flies nearly 2000 feet high and returns on colorful parachute.
- "EXCALIBUR" rocket over 2 feet tall. Fast to assemble; the

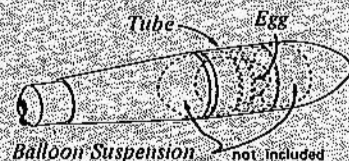

Excalibur has pre-cut fibre fins and decals. It streaks to well over 1000 feet... and returns each time on a colorful parachute.

- 4 POWERFUL ROCKET ENGINES
- "SURE-SHOT" IGNITERS
- PARACHUTE WADDING
- Complete ROCKETEER'S GUIDEBOOK

NEW PRODUCTS

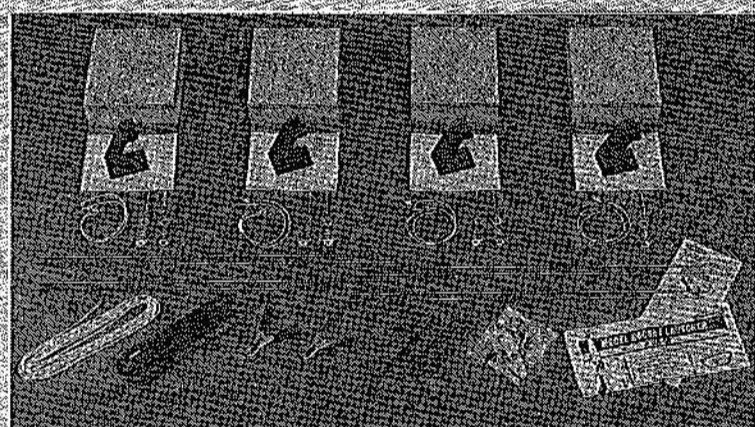

Here's a few of the latest new ideas, brought to you by Centuri's Celebrated Eccentric cerebrals (say that 5 times fast). These are too new to be in our latest catalog (no. 73), but you can bet they and lots of other great stuff will be in our next one.

EGG CAPSULE

Large molded light weight plastic capsule ideal for Egg-Lifting, or create your own large payload section. 2" maximum diameter; fits into #13 Centuri body tube. Includes #20 tube for joining the capsule sections (you cut apart along groove that runs around the middle.)

Cat. No. PNG-13E **\$1.95**
Capsule & Tube

Would you believe this all goes together to make a four-pad launch system? At last, a group launcher within the budget of any club or school!

GROUP LAUNCHER Complete 4-Pad Launch System

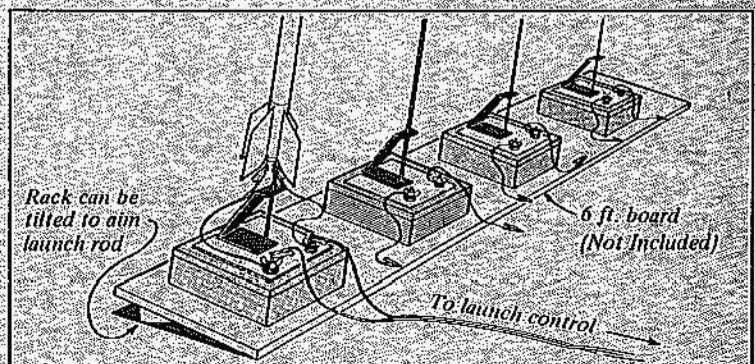

Here is what you get:

- Lowest Price Anywhere
- 4 Reliable Launch Stations
- Use Any 6 or 12 Volt Battery
- Launch Rockets In Succession
- Ideal For Clubs, Schools

- 4 Launch bases
- 4 Steel deflectors
- 4 Asbestos pads
- 4 Launch rods
- 4 Sets of igniter clips
- 4 Sets of hardware
- 1 Powr Control with 2 large battery clips
- 1 Complete instructions

Orig. Value **\$18.95**
NOW ONLY **\$10.95**

WAS 75¢

NOW 37¢

"FEATHER-WEIGHT RECOVERY"

This is the old version of our popular Lil' Hero II. Designed for featherweight recovery with the "short" style engines (no longer available).

It cannot be flown with standard length engines, but its worth its price in parts alone... OR substitute a 3" #7 body tube (ST-73) for use with regular engines.

SUBSTITUTE TUBE ST-73: 15¢

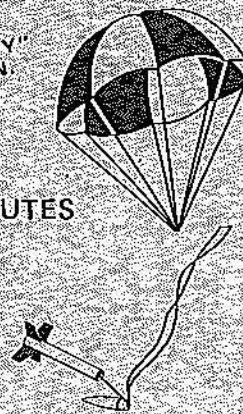

RECOMMENDED ENGINES

1/4A-2 If you use 1/4A-4 the ST-73!

QUANTITIES OF "GOODIES" LIMITED. WE MAY SUBSTITUTE, IF NECESSARY.

FOR "HEAVY" BIRDS, MAN!

SILK PARACHUTES

Professionally designed hemispherical chutes for sure safe recovery of large-scale rockets. Parabolic panels of alternating high-visibility colors are easy to spot at high altitudes. Durable SILRAY canopy has "spill hole" sewn into center. Strong nylon shroud lines firmly anchored into the canopy. Not recommended for use in body tubes smaller than #16.

PS-24 24" Red, White & Black \$3.95
PS-30 30" Red, White & Black \$4.95

STREAMER MATERIAL Ideal for recovering extremely high altitude birds. Allows rocket to descend nearer to the launch site than with a chute. Creped strip is approximately 3 in. by 7.5 ft. Attach to shock cord with tape or staples. Shipping Weight 2 oz.

RS-120 Package of one WAS 30¢ NOW 25¢

TESTOR'S SPRAY ENAMEL Economically priced spray enamel, especially useful for painting plastic parts. Dries to glossy finish. Available in Red, Yellow, Gloss Black, Silver, Metal Flake Orange, Metal Flake Red. Specify color. Shipping Weight 8 oz.

FP-7 3.2 oz. spray can WAS 69¢ NOW 59¢

TESTOR'S FLUORESCENT SPRAY PAINT High visibility paint in handy spray can. Easy to spot at high altitudes. Compatible over Krylon and most other enamels. Available in Orange, Yellow, Green, Red, Pink. Specify color. Shipping Weight 8 oz.

FR-5 3.2 oz. spray can WAS 89¢ NOW 75¢

TESTOR'S FLUORESCENT BRUSH-ON ENAMEL Adds that "finishing" touch in distinctive high visibility colors. May be applied over Krylon and other enamels. Available in Orange, Green, Yellow, Red, Pink, Thinner. Specify color. Shipping Weight 4 oz.

FP-50 1 oz. bottle WAS 35¢ NOW 29¢

MYLAR LAUNCHING LUGS

Fantastic lightweight lugs with super strength and hi-gloss finish. Attach to rocket body with glue. Used to guide rocket along rods up to 3/16" in diameter, 0.200" I.D. Ship. Wt. 1 oz.

LL-12 2" long WAS 3/20¢ NOW 3/15¢
LL-13 3" long WAS 3/25¢ NOW 3/20¢

FIN REINFORCING MATERIAL

Ultra thin lightweight Silray material for extra strength in fin-to-body joints. Keep fins from "stripping off" on high acceleration rockets. Apply with Superbond glue. Ship. Wt. 2 oz.

SR-12 1 sheet 12" x 12" WAS 30¢ NOW 20¢

LARGE SCREW EYES Heavy duty screw eyes for use in large balsa nose cones and payload capsules. Bright plated steel with coarse thread. Net Weight 0.1 oz. Shipping Weight 1 oz.

SE-20 Package of 3 WAS 20¢ NOW 15¢

HEAVY DUTY SNAP SWIVELS Sturdy, light weight hooks for quick snap on attachment of parachute to rocket. Keeps shroud lines from twisting during recovery and makes it easy to switch chutes from rocket to rocket. Shipping Weight 1 oz.

SW-7 Package of 6 WAS 55¢ NOW 35¢

PRINTED BALSA FIN GRAB BAG

Loads of high quality balsa sheets with pre-printed fin patterns! These popular fin shapes were left over when we converted many of our kits to die-cut balsa. Cut out and use fins as printed, or turn over and create your own designs. Sizes vary from 2" x 9" up to 3" x 12", our choice.

5 Assorted fin sheets 49¢

Catalog No. FGB-5

(Original value: \$1.60)

or 6 for 25¢

Catalog No. FPS-2

NEW REVISED MINI-MOTORS

Centuri Mini-Motors have undergone a dramatic change.

Our Mini-Motors originally were 2 1/2" long... this length allowed for up to "B" power. We had used special extra-strong paper to make mini size casings capable of withstanding "B" power. Now, the worldwide paper shortage, and other considerations have forced us to discontinue the "B" mini series, and to shorten the engines length.

Every cloud has a silver lining, though. Read on, true believer.

Limiting the Mini's to "A" power (and below) and decreasing their length from 2 1/2" down to 1 1/2" has an advantage for you. Our new, standard-length Mini-Motors may now also be used to fly other mini rockets on the market!

We now supply a few 1/4" long spacing tubes with each box of Mini-Motors. Simply insert the spacer into your engine mount, ahead of the Mini-Motor. Just leave out the spacer tube, if you use the previous longer version.

And speaking of mini rocket kits, here's what the newsletter of the Starford H.O. model rocket club of Honolulu, Hawaii has to say referring to a recent contest:

"The boost gliders were dominated by the new Centuri Mini Dactyl. In "Gnat BG" (1/4A power) the strategy was clear: beat the Mini Dactyl. All was to no avail, as all three places went to Mini Dactyl... winning time was 1 minute, 27 seconds...!!"

Cat. No. KM-6

Highly detailed plastic sheets. Use contact cement.

2 for 25¢

Catalog No. VFS-2 wide

VINTAGE GOODIES... MORE GOODIES... AND STILL MORE

Here's some perfectly fine merchandise from out of the past... in like-new condition, but no longer in our catalog.

GIANT FIN SHEETS

Heavy stock for large designs only. Four printed fins on 3/16" x 4" x 12" hi-grade balsa. Many designs available. Our choice.

NOW: 2 sheets for 50¢
Or 4 sheets for 75¢

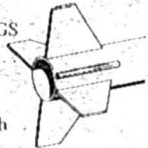

ALUMINUM LAUNCH LUGS

Super strong use contact cement.

WAS: 20¢ each

NOW: 4 for 15¢

Catalog No. AL-ASST.

LIA-50 LAUNCH STAND

Surplus launching platforms, left over from the days before we had "Powr-Pad" and "Servo Launcher"! Use with any 6 or 12 volt battery, and launch controller... such as our new "Powr-Control".

Plus all hardware, and assembly & launch instructions.

the amazing POINT

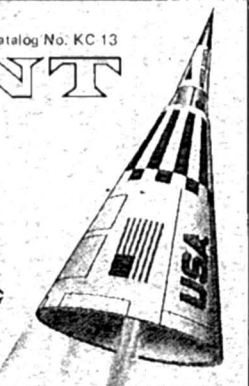

Catalog No. KC 13

- Balsa nose cone!
- PRE-COLORED!
- LIGHTWEIGHT FIBRE-PARTS!
- INCLUDES "COCKPIT"!
- 8" LONG, BUT FAT!

UNUSUAL BODY SHAPE ACTS AS ITS OWN PARACHUTE!

WAS \$1.50 NOW 75¢

RECOMMENDED ENGINE
B4-2 (ONLY)

EGG CRATE DECAL

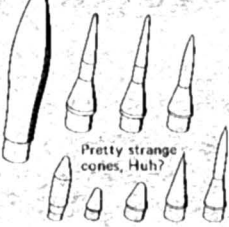

Handsome 3-Color 3"x8"

WAS 30¢
NOW 20¢

Catalog No. M-308

BALSA NOSE CONE GRAB BAG

Pretty strange cones, huh?

Unusual solid balsa nose cones from our out of the past! Fits popular tube sizes #5 thru #8... Our choice of cones.

4 Assorted cones for 49¢
Catalog No. CGB-4
(Original value: \$1.75)

FIRST GENERATION Lil' HERCULES

Catalog No. OLD KA-1

WAS 75¢
NOW 37¢

"FEATHER-WEIGHT RECOVERY"

This is the old version of our popular Lil' Hercules II. Designed for featherweight recovery with the "short" style engines (no longer available).

It cannot be flown with standard length engines, but it's worth its price in parts alone... OR substitute a 3" #7 body tube (ST-73) for use with regular engines.

SUBSTITUTE TUBE ST-73: 15¢
RECOMMENDED ENGINES

1/4A6-2 If you use
1/4A6-4 the ST-73!

Professionally designed hemispherical chutes for sure safe recovery of large-scale rockets. Parabolic panels of alternating high-visibility colors are easy to spot at high altitudes. Durable SIL RAY canopy has "spill hole" sewn into center. Strong-nylon shroud lines firmly anchored into the canopy. Not recommended for use in body tubes smaller than #16.

PS-24 24" Red, White & Black \$3.95
PS-30 30" Red, White, & Black \$4.95

STREAMER MATERIAL Ideal for recovering extremely high altitude birds. Allows rocket to descend nearer to the launch site than with a chute. Craped strip is approximately 3 in. by 7.5 ft. Attach to shock cord with tape or staples. Shipping Weight 2 oz.

RS 120 Package of one WAS 30¢ NOW 25¢

TESTOR'S SPRAY ENAMEL Economically priced spray enamel, especially useful for painting plastic parts. Dries to glossy finish. Available in Red, Yellow, Gloss Black, Silver, Metal Flake Orange, Metal Flake Red. Specify color. Shipping Weight 8 oz.

FP-7 3.2 oz. spray can WAS 69¢ NOW 59¢

TESTOR'S FLUORESCENT SPRAY PAINT High visibility paint in handy spray can. Easy to spot at high altitudes. Compatible over Krylon and most other enamels. Available in Orange, Yellow, Green, Red, Pink. Specify color. Shipping Weight 8 oz.

FR-6 3.2 oz. spray can WAS 89¢ NOW 75¢

TESTOR'S FLUORESCENT BRUSH ON ENAMEL Adds that "finishing" touch in distinctive high visibility colors. May be applied over Krylon and other enamels. Available in Orange, Green, Yellow, Red, Pink. Thinner. Specify color. Shipping Weight 4 oz.

FP-50 1 oz. bottle WAS 35¢ NOW 29¢

MYLAR LAUNCHING LUGS

Fantastic lightweight lugs with super strength and hi-gloss finish. Attach to rocket body with glue. Used to guide rocket along rods up to 3/16" in diameter. 0.200" I.D. Ship. Wt. 1 oz.

LL-12 2" long WAS 3/20¢ NOW 3/15¢

LL-13 3" long WAS 3/25¢ NOW 3/20¢

FIN REINFORCING MATERIAL

Ultra-thin lightweight Silray material for extra strength in fin to body joints. Keep fins from "stripping off" on high acceleration rockets. Apply with Superbond glue. Ship. Wt. 2 oz.

SR-12 1 sheet 12" x 12" WAS 30¢ NOW 20¢

LARGE SCREW EYES Heavy duty screw eyes for use in large balsa nose cones and payload capsules. Bright plated steel with coarse thread. Net Weight 0.1 oz. Shipping Weight 1 oz.

SE-20 Package of 3 WAS 20¢ NOW 15¢

HEAVY DUTY SNAP SWIVELS Sturdy, lightweight hooks for quick snap on attachment of parachute to rocket. Keeps shroud lines from twisting during recovery and makes it easy to switch chutes from rocket to rocket. Shipping Weight 1 oz.

SW 7 Package of 6 WAS 55¢ NOW 35¢

PRINTED BALSA FIN

GRAB BAG

Loads of high quality balsa sheets with pre-printed fin patterns! These popular fin shapes were left over when we converted many of our kits to die-cut balsa. Cut out and use fins as printed, or turn over and create your own designs. Sizes vary from 2" x 9" up to 3" x 12", our choice.

5 Assorted fin sheets 49¢
Catalog No. FGB-5
(Original value: \$1.60)

ID-50

Steel Exhaust Deflector (same as in LIA-50)

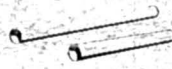

WAS 35¢ NOW 10¢
Catalog No. ID-50 OR: 6 for 50¢

QUANTITIES OF "GOODIES" LIMITED. WE MAY SUBSTITUTE, IF NECESSARY.

FOR "HEAVY" BIRDS, MAN.

SILK PARACHUTES

SURPLUS STORE

These little fellers are still in our catalog, but frankly we've got more than we need. Available on sale only thru this "sweep-up" order blank. Just look 'em up in your catalog, and add onto the "Sweep-Up" order blank.

NOW: 10¢
or 6 for 25¢

Catalog No. FPS-2

NEW REVISED MINI-MOTORS

Centuri Mini-Motors have undergone a dramatic change.

Our Mini-Motors originally were 2 1/2" long... this length allowed for up to "B" power. We had used special extra-strong paper to make mini size casings capable of withstanding "B" power. Now, the worldwide paper shortage, and other considerations have forced us to discontinue the "B" mini series, and to shorten the engines length.

Every cloud has a silver lining, though. Read on, true believer... Limiting the Mini's to "A" power (and below) and decreasing their length from 2 1/2" down to 1 1/2" has an advantage for you: Our new, standard-length Mini-Motors may now also be used to fly other mini rockets on the market!

We now supply a few 3/4" long spacing tubes with each box of Mini-Motors. Simply insert the spacer into your engine mount, ahead of the Mini-Motor. Just leave out the spacer tube, if you use the previous longer version.

And speaking of mini rocket kits, here's what the newsletter of the Starford H.O. model rocket club of Honolulu, Hawaii has to say referring to a recent contest:

"The boost gliders were dominated by the new Centuri Mini-Dactyl. In 'Gnat BG' (1/4A power) the strategy was clear, beat the Mini-Dactyl. All was to no avail, as all three places went to Mini-Dactyl... winning time was 1 minute, 27 seconds...!!"

Cat. No. KM-6 \$2.25

RECOMMENDED MOTORS
Double Glider 1/4A-3M, A4-2M
Single Glider 1/4A-2M, 1/4A-3M, A4-4M

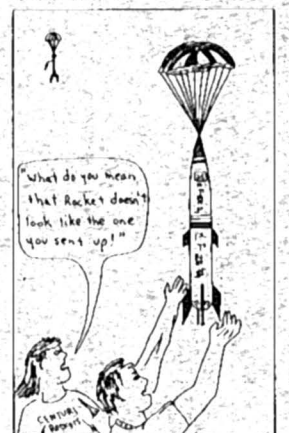

CARTOON CONTEST

CONTEST PRIZE WORTH \$4.50

Want to see your cartoon published? Just draw what you think is a funny cartoon about model rocketry and send it to me, ye Olde Editor, "Rocket Times".

Each issue, we will pick the one most suitable for publication, just like we did below. This little jewel was sent in by JOHN STUNDIS of Bohemia, N.Y.

NOTE: YOU MUST USE THIS ORDER BLANK TO ORDER THE ITEMS ADVERTISED IN THIS ISSUE!

ENERJET CATALOG NOW AVAILABLE

The 1974 Enerjet Special Edition Catalog (no. 741) is hot off the press and ready for experienced rocketeers. In case you have not heard (and who hasn't!), Enerjet Inc. is the Centuri subsidiary which provides the world's most sophisticated high performance model rocket motors the large and fantastic "Enerjets".

This brief but fascinating catalog is FREE for the asking, if you will do us one small favor: Provide us a stamped self-addressed envelope big enough for us to send it to you... a standard business size envelope (about 9 1/2" x 4") should do the trick.

If you are at least 16, have considerable model-rocket experience, and willing to pay more for ultimate performance, then give it a look-see.

FANTASY-FLEET

Just a reminder... 3 great spacey designs... Each one includes a free science-fiction story sheet about the rocket's "Planet of Origin".

MODEL ROCKET LAUNCH STAND

Catalog No. 3610

\$395

universal design for all sizes of model rockets and engines

LAUNCH ROD
Two piece 1/8" diameter, for all standard model rockets.

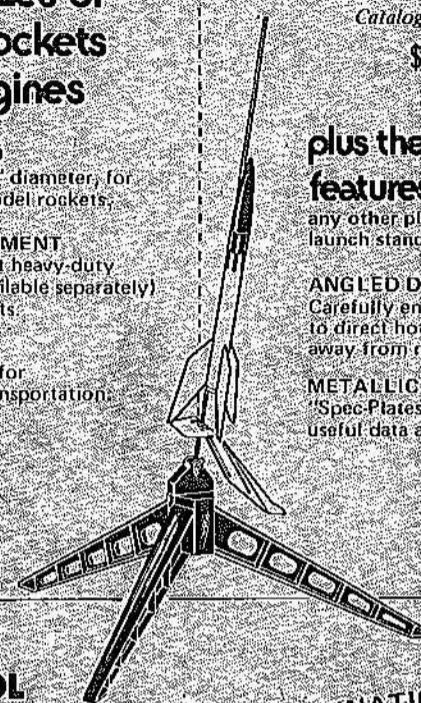

TILT ADJUSTMENT
Can also accept heavy-duty 3/16" rod (available separately) for giant rockets.

COMPACT
Legs come off for storage and transportation.

plus these unique features not found on any other plastic tripod launch stand.

ANGLED DEFLECTOR
Carefully engineered to direct hot exhaust away from rocket fins.

METALLIC "DECALS"
"Spec-Plates" provide useful data at launch site.

POWER-CONTROL

GENERAL PURPOSE LAUNCH CONTROLLER

A "Spin-Off" from the Power-Pad... includes 15 feet of firing line with pre-soldered micro-clips, 5 feet of jumper cable with LARGE battery clips. Use any heavy duty 6 or 12 volt battery, even a car battery. Can be modified for cluster ignition.

Catalog No. EFC 3

\$395

COMBINATION OFFER!
GET A "POWER PAIR"...

A Power-Tower and a Power-Control for only \$750

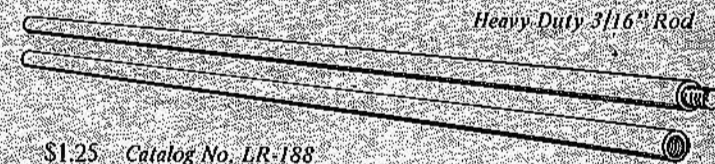

(Does not count toward Super-Sale Super-Sale see order blank)

HEAVY DUTY LAUNCHINGS

We strongly recommend the use of a stronger stiffer, 3/16" diameter launch rod, when launching extra large rockets, cluster-engine birds such as the Centuri Saturn V, Saturn 1B and 1/45th Little Joe, or any rocket with engine power greater than "D" class.

Inexpensive 3/16" x 36" piano wire may be found in many hobby shops... Welding rod of this size is carried by hardware and building supply stores... or you may order a special machined 2-piece rod from us, collapsible for easy storage.

Heavy Duty 3/16" Rod

\$1.25 Catalog No. LR-188
